PROJECTS

Project Name: Jewellery Website
Description: Developed an e-commerce platform for showcasing and selling jewellery products online. The website features an intuitive design, product catalog, search functionality, and a responsive layout.
Tech Stack: HTML, CSS, JavaScript, React (or any specific framework/library used), and other tools like Bootstrap, APIs, etc.
Key Contributions:
- Designed and implemented a visually appealing, user-friendly interface.
- Created product listing pages with filters and sorting features.
- Ensured responsive design for compatibility across devices and browsers.

Project Name: Data Professional Dashboard
Description: Designed and developed an interactive Power BI dashboard to visualize and analyze professional data across different regions worldwide. The dashboard provides insights into trends, demographics, and regional distributions.
Tech Stack: Power BI, DAX , Data Modelling and Data Transformation .
Key Contributions:
- Integrated and cleaned data from multiple sources for accurate visualization.
- Created dynamic filters and drill-throughs for detailed analysis.
- Designed user-friendly layouts to enhance usability and interpretation.
